The **Barcelona region is a globally-recognised hub for biotech and pharma**. The BioRegion of Catalonia has 300 biotech, pharma and medtech companies, 50 research institutes, 10 universities offering life sciences degrees, 15 hospitals with noteworthy research activity, 20 scientific and technology parks and large-scale scientific facilities like the Alba-Cells synchrotron and the Mare Nostrum supercomputer. Oncology and nanotechnology stand out as R&D strengths in Catalan life science sector. For more info:

www.biocat.cat/en

UKTI Barcelona is holding an **exclusive networking reception** which will take place alongside the flagship partnering conference, **BIO-Europe Spring**. The reception will include invitation-only entrance for high-level stakeholders from the British and Spanish biotech and pharma industries.

This UKTI networking reception will provide British companies and cluster organisations unique access to key stakeholders and a cost-effective way to raise their profile to a high-level, international audience.

The reception is organised under the UK government subsidised OMIS (Overseas Market Introduction Service) scheme and opportunities for attendance, presentation and sponsorship are now on offer.

For more details and for costs please refer to our attached price sheet and get in touch with the UKTI Barcelona Life Sciences team, **Jessica Griffiths** or **Samantha Brindle** using the contact details above **by 15th February 2013**.
